A DAY WITH THE EXPERTS

Dyslexia is characterised by difficulty with learning to read and with differing comprehension of language despite normal or above-average intelligence. This includes difficulty with phonological awareness, phonological decoding, processing speed, orthographic coding, auditory short-term memory, language skills and verbal comprehension, or rapid naming. Dyslexia is the most common learning difficulty.

Dyslexia, is a disorder that needs to be dealt with and not shunned upon. People often do not know how to cope with dyslexic children, this goes for parents, teachers and also students who are dyslexic and often times do not realise it or get frustrated by it.

Having said this the Maharashtra Dyslexic Association is pleased to announce a comprehensive discussion on the coping mechanisms of dyslexia by a panel of speakers who are all well versed in the ways in which dyslexic children should be taught, along with coping mechanisms by which parents and teachers can learn to tackle the problem at hand.

The Speakers

Prof Steve Chinn, PhD, FRSA, who received his PhD in Applied Physics, has been working with students with dyslexia for over three decades.

Dr Tilly Mortimore; Senior Lecturer in Inclusion and SPLD/Dyslexia at Bath Spa University, UK.

Malcolm Litten, B.A. (Hons); Dip. Ed.; M.Phil (Special Needs); AMBDA, served as English Teacher/Head of English at Mark College under its founder Dr Steve Chinn for over twenty years.
